

August 9, 2012

Greetings,

BroadSoft is pleased to announce that the OAISYS Tracer and Talkument call recording solution has been formally validated with BroadWorks. The application(s) listed below have been validated as interoperable with the BroadWorks SIPREC interface. Any issues and limitations identified during the interoperability testing are documented in the BroadSoft Partner Configuration Guide (PCG) *PartnerConfigGuide OAISYS Tracer Talkument Solution*. The PCG is available to BroadSoft customers on the BroadSoft Xchange website, <http://xchange.broadsoft.com>.

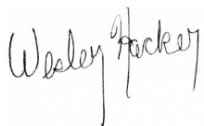

BroadSoft validates that the application works properly with the BroadWorks SIPREC interface. BroadSoft does not validate qualitative aspects of the application or other application capabilities, which are outside the scope of the SIPREC signaling interface.

The validation covers the OAISYS versions(s) and BroadWorks release listed below. Other versions and releases tested previously are documented in the PCG.

OAISYS Tracer and Talkument Solution version V7.3.0
BroadWorks Release 18.SP1

*This validation also applies to subsequent compatible maintenance releases to this device version.

Thanks,
